

Your Satisfaction is important to us.

As one of the largest manufacturers of building materials in North America, KP Building Products is renowned for offering a vast array of innovative, industry-leading products.

For KP's vinyl products, this means using the finest polymers and pigments in our manufacturing process. It means continually creating new, stronger, more attractive designs. And it means backing it all up with a lifetime limited warranty.

See the full warranty for details. Warranties are available from your KP distributor or on our website @ www.KPproducts.com

KP is a company with a superior winning track record.

- #1 vinyl siding in a leading consumer magazine (Norman Rockwell siding)
- #1 in vinyl siding color choices
- #1 in fade resistant vinyl siding

**KP Building Products:
We make everything you build with.**

KP Building Products is committed to the building materials industry, with 10 facilities, and more than 1,500 employees in North America. When it comes to the exterior home design there is no one more passionate about vinyl than KP. This passion runs in the family. For over four decades, KP has remained focused on delivering the highest level of quality and the most extensive array of vinyl siding and accessories.

**With even higher standards
from today's advanced technology.**

KP Building Products maintains its own Advanced Technology Center for continuous product improvement and development. A strong commitment to quality, consistency, color retention, strength, rigidity and durability applies to all our vinyl siding products.

Maxim's double-thick .092" Cyclone System™ nail hem provides extra rigidity and wind load resistance up to 188 mph.

Maxim Ultra-Vinyl™ UV Technology premium vinyl compounds and UV inhibitors are used to help combat the harsh rays of the sun. This ensures long-term weatherability and color retention.

Maxim's self-aligning locking system is designed to snap together with a positive connection, while allowing for flexibility in panel positioning during installation.

Maxim is manufactured to a premium thickness of .046" for outstanding impact resistance and strength.

The low-gloss rough cedar texture creates a surface so real, it feels like it could give you splinters.

A full 3/4" profile provides dramatic shadow lines that mirror premium wood siding, and give added rigidity for a straighter appearance on the wall.

The low-angle, square edge also provides an extra measure of authenticity.

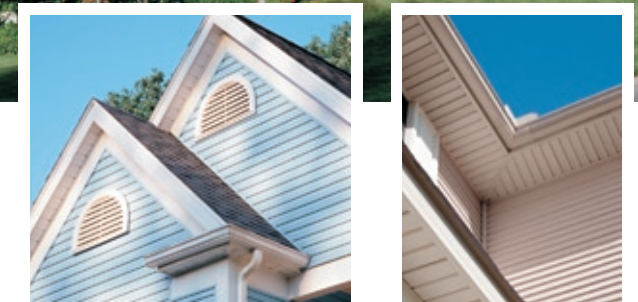

**Designed and Manufactured
for Maximum Longevity**

Crisp, clean lines. The luxurious look of freshly-painted wood siding. Maxim has been carefully designed to give your home a picture-perfect, low-maintenance exterior. With all the latest technology built right in, Maxim offers a thicker panel, engineered for rigidity, to provide a smooth installation every time. Deeper shadow lines enhance the authentic look. And the unique locking system ensures unyielding protection from the elements.

**Your whole house can be
high quality with low maintenance
from siding to soffit to trims.**

A full complement of accessories – soffit, fascia, window and door trim, crown moulding, and undersill trim completes your home's low-maintenance exterior.
