

Your Satisfaction is important to us.

As one of the largest manufacturers of building materials in North America, KP Building Products is renowned for offering a vast array of innovative, industry-leading products.

For KP's vinyl products, this means using the finest polymers and pigments in our manufacturing process. It means continually creating new, stronger, more attractive designs. And it means backing it all up with a lifetime limited warranty.

See the full warranty for details. Warranties are available from your KP distributor or on our website @ www.KPproducts.com

KP is a company with a superior winning track record.

- #1 vinyl siding in a leading consumer magazine (Norman Rockwell siding)
- #1 in vinyl siding color choices
- #1 in fade resistant vinyl siding

**New KP Maxim® XL siding –
the authentic, rough-grained look
and feel of cedar siding –
now with 33% fewer seams.**

In any vinyl siding installation, seams are the natural overlap where two pieces of siding come together. A professional installer will work hard from the start to minimize the appearance of this overlap, but every siding job has visible seams. KP Maxim® XL siding is almost 4' longer than most competitive vinyl sidings, with a full 16'8" length. So some walls will have no seams at all! And most will have far fewer. That's the length KP will go to make a more authentic siding job with the ultimate in wood appearance.

- Maxim® XL's double-thick .092" Cyclone System™ nail hem provides extra rigidity and wind load resistance up to 188 mph.
- Maxim® XL siding Ultra-Vinyl™ UV Technology premium vinyl compounds and UV inhibitors are used to help combat the harsh rays of the sun. This ensures long-term weatherability and color retention.
- Maxim® XL self-aligning locking system is designed to snap together with a positive connection, while allowing for flexibility in panel positioning during installation.
- Manufactured to a premium thickness of .046" for outstanding impact resistance and strength.
- The low-gloss rough cedar texture creates a surface so real, it feels like it could give you splinters.
- A full 3/4" profile provides dramatic shadow lines that mirror premium wood siding, and give added rigidity for a straighter appearance on the wall.

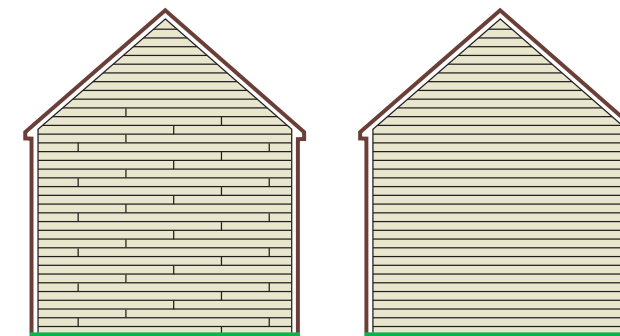

**Virtual Cedar Wood Grain
with Real-Time
Low Maintenance**

Enjoy the look of wood, without the worry. That wood siding you long for may be beautiful when it is new or freshly painted, but its beauty is short-lived. KP Maxim® XL siding looks like you spent the money for an expensive wood siding installation, and instead of scrapers and paintbrushes, you'll be using a garden hose from time to time to maintain its appearance. It's amazing peace of mind, backed by a lifetime limited warranty. Check our website for details and a copy of the warranty.

**Your whole house can be
high quality with low maintenance
from siding to soffit to trims.**

A full complement of accessories – soffit, fascia, window and door trim, crown moulding, and undersill trim completes your home's low-maintenance exterior.

**Gain the continuous reduced-seam look
with KP Maxim® XL siding**

On the typical 16', two-story wall, you could have more than 30 seams with the average 12'6" siding panel. But with KP Maxim® XL siding's 16'8" vinyl siding there will be no visible seams.

33% Longer

Give your home the extra curb appeal that a longer panel with fewer seams can provide.
